

**List of References** [I've added entries in bold typeface. Since we didn't have much room left, I've removed some of last year's references but listed them at the end of this document in case any should be added back in. Note that we have ten pages, but that will be re-formatted in Times New Roman 12.]

**This list demonstrates that preservation has been a concern of the DH community since the late 1990s. We present the list in two parts in order to demonstrate our awareness of the increasing attention to the challenges addressed in our application.**

**Part I: Early warnings, up to 2005.**
