2012-13

"Distant Listening: Discovering Sound Patterns with ProseVis"
- Tanya Clement, Assistant Professor, School of Information
University of Texas at Austin

This workshop will introduce ProseVis, a tool that allows readers to discover aural features across literary texts. A SEASR tool, ProseVis makes prosodic features of literary texts discoverable by overlaying data produced by OpenMary, a text-to-speech application tool for extracting aural features and instance-based predictive modeling features as color codes on the original text.

Wednesday, March 6th | 3-4 pm | Maker Lab (TEF 243)

register: maker@uvic.ca
open to eight participants
